Comments:	Good morning. Unit is cold this morning-zwerlin- now i notice that when i remote my work at 7pm the unit will be so hot like 85 to 87 degree. last week Friday in the afternoon it was off again then i send a general message to everyone not to change or turn off the thermostat that if they feel the unit is too cold for them they can come with their jacket. However, when i come in on Saturday to check the staff and the individual after few minute later i notice the unit was hot and I M also complain that he feel hot i went to check the thermostat but this time it was switch to heat and the room was 82 degree then i change it back to cold and i informed the coordinator on Saturday evening. This morning i came in for LM appointment and the thermostat was of again
