Escort to and from Vehicle Transportation

For all individuals to ensure their safety to cross the street

Staff is to walk the individual to the van for departure for the day program in the morning.

Staff is to meet the individual at the van to supervise and assist the individual into the home upon return from the day program.

This is the expectation of all CSC staff.

Since pick up and drop off times are known in the home, staff should be watching for the transportation vehicle's arrival in the morning as well as the afternoon by opening blinds to see outside and staying within the front of the home so the horn can be heard. Staff should be ready to exit the home with the individual or to go meet the individual at their van.
